EDUCATION

Masters of Management in Analytics, McGill University	01/2026 – Present
Honors in Bachelor of Science, Computer Science, York University	09/2020 – 04/2025

PROFESSIONAL EXPERIENCE

Mercor, AI trainer • Evaluated 200+ LLM-generated responses using standard rubrics, assessing accuracy, relevance, clarity, and completeness. • Identified weaknesses in model outputs and provided feedback to improve response quality and user experience. • Created 30+ tutorials and training materials to guide AI systems toward more effective and consistent responses. • Assessed outputs across varied task types, ensuring responses were correct, well-structured, and easy to understand. • Contributed to training and benchmarking LLM models used in client-facing tools and applications.	01/2026 – Present
Toronto Hydro, Data & Tech Intern • Put together an interactive dashboard with 15+ KPIs using SQL, Excel VBA, and SAP, replacing manual reporting methods and providing the management with easy to understand operational and financial insights. • Built a 12-month operational performance report from SAP reports of field deployment data, improving the managements overall understanding of the field team operations. This contribution lead to a 15% reduction in resource spending across field operations. • Worked with project managers to analyze dispatcher performance using SAP software and company data, driving a ~23% reduction in misrouted emergency calls and improving customer satisfaction. • Built data pipelines in Python to extract, transform, and load (ETL) company structured datasets for analysis.	01/2023 – 12/2023
hEr Volution, Advanced Coding Instructor • Gave Interactive lectures that focused on helping students build programming skills, understanding the programming concepts and be able to apply them in real world projects. • Simulated debugging and QA scenarios to expose students to common development challenges and enhance their technical problem-solving. • Conducted personalized code reviews and feedback sessions, ensuring students understand how to fix technical issues on their own. • Helped improve student proficiency by facilitating structured learning and test preparation – raising average test scores by 20% by the final weeks compared to start of the course.	07/2022 – 09/2022

PROJECTS

Full-Stack Electric Car E-Commerce Platform 🔗 Built a fully functioning web app using React, Node.js, Express and MongoDB, with catalog filtering, loan calculator, checkout and chatbot support. Prioritized user experience and system reliability through iterative testing and refinement.
Marvel Inspired Tower Defence Game 🔗 Built a vanilla HTML/CSS/JavaScript tower defense prototype inspired by classic Marvel web games, with no external assets or game engine. Implemented a top-down city map with waves, boss fights, upgradeable character turrets, and procedural canvas combat effects.
YUNeedMoney (Finance Management App) 🔗 Built a full-stack JavaScript finance app using Plaid and OpenAI APIs to track spending, budgets, and transactions. Implemented JWT authentication and real-time financial dashboards with MongoDB storage.
Automated API Data Pipeline 🔗 Built a Python ETL pipeline that extracts CoinGecko crypto market data, transforms it, and loads daily snapshots into Neon PostgreSQL. Added upserts, unit tests, environment config, and GitHub Actions for CI/CD and scheduled runs.
LLM-Powered Document Question Answering System 🔗 Developed a system with Python to query unstructured PDF documents using natural language by implementing a RAG pipeline with OpenAI embeddings vector search (FAISS). Retrieved relevant document segments and generated responses grounded in source content.

AWARDS

Experience Ventures Hackathon, York University 1st place – Collaborated with a 4-person team to design and prototype an app within 5 days that connected students seeking mental health support with peers studying or training to become therapists. Recognized for creativity, adaptability, and potential community impact.
--

SKILLS

Programming Python, SQL, JavaScript, TypeScript	Backend & Integration REST APIs, JSON/XML, System Integration
Data & Databases ETL pipelines, Data Modeling, Data Transformation, Relational Databases	Tools & Platforms Git, Postman, Tableau, SharePoint, Azure, Databricks

CERTIFICATES

- MIT IDSS Data Science and Machine Learning 🔗
